## PANORAMA

The Panorama bench system pays homage to the first bench that we ever produced. However, the new design sports a minimalist and somewhat brutalist aesthetic. The durable result of the design makes it ideal for high transit public spaces. The monolithic piece includes backrest and it is easy to install, sought out qualities for the urban setting. The curved versions of the design allow for the creation of dynamic and diverse spaces, providing the possibility to outline and lead the contours of the public space being intervened.
